CAP-T

Cap Torque Tester

- 3 Year Warranty
- Accepts samples up to 7.5" (189.4 mm) diameter
- Selectable units of measurement (lb-in, kg-mm, N-cm)
- Real time and peak mode (selectable)
- Both clockwise and counterclockwise operation
- Battery or AC operation
- Accuracy: $\pm 0.5\%$ of full scale ± 1 digit

The new CAP-T Cap Torque Tester accurately measures twist-off and twist-on force. The CAP-T is an ideal tester for bottlers, food and beverage companies, and others. The tester features a solid aluminum housing and rugged construction for many years of service in laboratory or production environments. Adjustable posts effectively grip a broad range of container shapes and sizes, while a set of optional jaws are available as an alternative gripping method. The CAP-T captures peak torque in both clockwise and counterclockwise directions for application and removal measurements.

Suitable for a wide range of container shapes and sizes, the CAP-T is an ideal tester for bottlers, food and beverage companies and others.
